Title Records

This section shows you each State where the vehicle has been titled, when it was titled, the odometer reading on the date of title, etc. There is good information here to protect you from fraud. Keep an eye out for the odometer readings. If the current odometer reading is less than it was in one of these title records, you might suspect a fraud tactic called "Odometer Rollback".

Date	State of Title	Odometer Reading	Unit Of Measure	Title Type
------	----------------	------------------	-----------------	------------

Sorry! No current or historical title records for this vehicle.

Junk / Salvage

Salvage or junk information from titles or other sources.

Date	Reporting Entity	Intended for Export?	Vehicle Disposition
------	------------------	----------------------	---------------------

No junk or salvage have been reported.

Insurance Records

Insurance total loss information.

Date of Total Loss Declaration

Reporting Entity

No total loss incidents have been reported.

Problem Checks

Record of Replica?	✓	No problems found!
Record of Street Rod?	✓	No problems found!
Record of Kit Assembly?	✓	No problems found!
Record of Logging Vehicle?	✓	No problems found!

Consumer Access Product Disclaimer

The National Motor Vehicle Title Association (NMVTA) is an electronic system that

contains information on certain automobiles titled in the United States. NMVTA is intended to serve as a reliable source of title and brand history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are **strongly encouraged to also obtain an independent vehicle inspection** to ensure the vehicle does not have hidden damage. The Approved NMVTA Data Providers (look for the NMVTA logo) can include vehicle condition data from sources other than NMVTA.

NMVTA data **INCLUDES** (as available by those entities required to report to the System):

- Information from participating state motor vehicle titling agencies.
- Information on automobiles, buses, trucks, motorcycles, recreational vehicles, motor homes, and tractors. NMVTA may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.
- Information on "brands" applied to vehicles provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.
- Most recent odometer reading in the state's title record.
- Information from insurance companies, and auto recyclers, including junk and salvage yards. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.
